

## UNDERSTANDING AND DECODING A PENNTEX ALTERNATOR SERIAL NUMBER

Find out the Alternator Model by looking up the Serial Number

PennTex has used the same format for Alternator Serial Numbers since the very first one. There are three parts to the number: the **Month** of manufacture, the **Year** of manufacture, and the **sequence number**. The following are random Serial Number examples to show you what we mean:

<b>Alternator Serial Number:</b> (listed for illustration only)	<b>Month of Manufacture:</b>	<b>Year of Manufacture:</b>	<b>Sequence Number</b>
<b>Alternator 99912345</b>	<b>99912345</b> 9 = September	<b>99912345</b> 99 = 1999	<b>99912345</b> 12,345th Built
Open the 1999 Serial Number List. Go to September and find your Serial Number. The Model Number will be next to it.			
<b>Alternator 50232738</b>	<b>50232738</b> 5 = May	<b>50232738</b> 02 = 2002	<b>50232738</b> 32,738th Built
Open the 2002 Serial Number List. Go to May and find your Serial Number. The Model Number will be next to it.			
<b>Alternator 120557142</b>	<b>120557142</b> 12 = December	<b>120557142</b> 05 = 2005	<b>120557142</b> 57,142th Built
Open the 2005 Serial Number List. Go to December and find your Serial Number. The Model Number will be next to it.			
<b>Alternator 100880854</b>	<b>100880854</b> 10 = October	<b>100880854</b> 08 = 2008	<b>100880854</b> 88,0854th Built
Open the 2008 Serial Number List. Go to October and find your Serial Number. The Model Number will be next to it.			
<b>If you have any questions contact us at 877-590-7366</b>			

If your serial number beginning with **1** through **9** starts with a zero as in **09** instead of **9**, this was just how the number was recorded. The serial number with or without a zero at the beginning is the same serial number.
